Preliminary Programme Køge, 26th-28th September 2017

Wednesday 27th September

08:30 Leave/pick up from hotels

09:00 Parallell programmes

We need to know beforehand who will participate in each of the 3 groups

All participants will receive a piece of paper with a number of questions to relate to in the discussions during the day.

Morning: Study Visits

Group 1 Waste to resource

9:00 CP Kelco, world leading pectin producer – their excess heating is used in district heating and citrus peel in biogas (with group 2)

11:00 Kara/Noveren - a waste management company

Group 2 Strategic energy planning

9:00 CP Kelco, world leading pectin producer – their excess heating is used in district heating and citrus peel in biogas (with group 1)

11:00 Solrød Biogas - removing seaweed and algae and using it in biogas production

Group 3 Sustainable urban planning

9:00 Køge Kyst – a tour around this "new" part of town

11:00 Permatopia – a sustainable, ecological community south of Køge

Afternoon:

The participants continue in the same groups.

"National" presentations of challenges, opportunities in each country/partner etc

Based on the study visits and presentations, work with mutual challenges and possible solutions and try to identify some potential projects.

17:30 End of the formal part of the day

19:00 Dinner at the Green House
